

## **PONY AI Inc. and ComfortDelGro Expand Singapore Autonomous Mobility Service with Consumer-Facing App Access**

2026-06-22 at 5:00 AM EDT

SINGAPORE, June 22, 2026 — Pony AI Inc. (“Pony.ai” or the “Company”) (NASDAQ: PONY; HKEX: 2026), a global leader in achieving large-scale mass production and commercialization of autonomous driving technology, today announced that its autonomous mobility service in Singapore, operated in collaboration with ComfortDelGro Corporation Limited (“ComfortDelGro”), a leading multi-modal transport operator, is now available for booking through ComfortDelGro’s Zig app.

The launch of consumer-facing app access marks the next step in the service’s phased rollout in Punggol, expanding access beyond the earlier by-invite community ride phase and moving the service toward a more scalable, user-facing operating model.

Starting June 22, residents and visitors in Singapore in the Punggol area can use ComfortDelGro’s Zig app to book an autonomous ride. Once a booking is confirmed, riders can board a Zig-branded vehicle powered by Pony.ai’s driverless technology and travel along the service route in northern Punggol.

The service has been developed through a phased rollout with the support of local regulators and the local community. The ComfortDelGro and Pony.ai route in Punggol is designed to enhance first- and last-mile connectivity by linking residential areas with key amenities and transport nodes, including Punggol Coast Mall, Punggol Coast MRT station, One Punggol, Oasis Terrace and Punggol Plaza.

“We are grateful for the trust and support from regulators, ComfortDelGro and the local community,” said Dr. James Peng, Founder and CEO of Pony.ai. “As we continue to refine the service through real-world operations, our focus remains on delivering safe, reliable and convenient autonomous mobility that can complement existing public transport systems.”

Cheng Siak Kian, Managing Director and Group CEO of ComfortDelGro, said: “Autonomous mobility is no longer a distant ambition. For ComfortDelGro, it is becoming part of how we operate. From our successful robotaxi pilot in Guangzhou to today’s public launch in Punggol, we are integrating technology, infrastructure, and operational know-how needed to deploy AV services safely and at scale.”

The expanded consumer-facing access further advances Pony.ai’s dual-engine growth strategy to scale autonomous mobility through deep local partnerships and phased commercial deployment across both domestic and international markets. Supported by growing user demand, expanded service areas and improving operating efficiency, Pony.ai is continuing to scale its Robotaxi fleet, with a target of more than 3,500 Robotaxis by the end of the year and operations across more than 20 cities worldwide.

### **About Pony AI Inc.**

Pony AI Inc. (NASDAQ: PONY; HKEX: 2026), founded in 2016, is a global leader in achieving large-scale mass production and commercialization of autonomous driving technology. Pony.ai is committed to delivering safe, advanced, and reliable autonomous driving technology and solutions. At the heart of Pony.ai’s strategy is its proprietary world model *PonyWorld* and its *Virtual Driver* technology. Together, they power the development and scaling of its Robotaxi services, Robotruck services, and Intelligent solutions businesses. With operations spanning China, Europe, East Asia, the Middle East, and beyond, Pony.ai stands among a select few companies globally to achieve fully driverless commercial operations. Pony.ai has forged deep and extensive partnerships across the autonomous driving value chain, enabling it to accelerate the commercialization of autonomous driving in line with its ultimate vision: “Autonomous Mobility Everywhere.” For more information, please visit: <https://ir.pony.ai>.
